DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-13, drawn to method of making, classified in various class and subclass.
- II. Claims 14-20, drawn to method of use, classified in class 148, subclass 240.
- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, i.e., one is for making the material and the other is for incorporating the material into coating material for coating purpose.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and by their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 4. Should applicant elect invention of group I, this application contains claims directed to the following patentably distinct species of the claimed invention:
 - a) passive material resistive to general oxidation reactions include metal,
 - b) passive material resistive to general oxidation reactions include ceramic,
 - c) passive material resistive to general oxidation reactions include biochemical substances,
 - d) passive material resistive to general oxidation reactions include polymers,
 - e) passive material resistive to general oxidation reactions include composite.
- 5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to

additional species which are written in dependent form or otherwise include all the limitations of an

allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant

must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant

should submit evidence or identify such evidence now of record showing the species to be obvious

variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one

of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection

under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Ngoclan T. Mai whose telephone number is (571) 272-1246. The examiner can normally

be reached on 9:30-6:00 PM Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy

King can be reached on (571) 272-1244. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.
